Addendum 02 - Clarifications and Changes

MetroLink Regional Transit Authority I Solicitation ML-2026-041 I 24 November 2026

INSTRUCTIONS TO BIDDERS

This fictional addendum is issued against 01_RFP_MetroLink_Digital_Procurement.pdf. It forms part of the solicitation. Where this addendum expressly changes a requirement, the revised wording takes precedence over the original RFP. All other terms remain unchanged.

ADDENDUM NUMBER	**02**
ISSUE DATE	**24 November 2026**
QUESTION CUT-OFF	**24 November 2026, 17:00 local**
REVISED CLOSING DATE	**18 December 2026, 16:00 local**
SUBMISSION METHOD	**Procurement portal; commercial response remains separately sealed**

FORMAL AMENDMENTS

AM-01 — REVISED RESPONSE DEADLINE

Replace the closing date on page 1 of the RFP with 18 December 2026 at 16:00 local time. No other procurement milestone changes.

AM-02 — REVISED MIGRATION SCOPE

The Authority will provide up to 10,000 active supplier records, increased from 8,000. Historical closed records are excluded from the fixed-scope migration.

AM-03 — AVAILABILITY MEASUREMENT

NFR-001 availability is measured monthly, excluding maintenance windows notified at least 5 business days in advance, up to 4 hours per calendar month.

AM-04 — DATA RESIDENCY

The UK residency restriction applies to primary data, backups, logs, and support-access sessions. Bidders must identify any subprocessor that can access production data.

Addendum 02 - Clarifications and Changes

MetroLink Regional Transit Authority I Solicitation ML-2026-041 I 24 November 2026

QUESTIONS AND ANSWERS

Q **Can supplier applicants save a partly completed application and return later?**

A Yes. This is mandatory for FR-001. A supplier must be able to resume an application for at least 30 calendar days, subject to re-authentication.

Q **May a bidder propose a managed integration service instead of a direct finance-system API?**

A Yes, if the response explains reconciliation, failure handling, duplicate prevention, operational ownership, and all recurring charges.

FURTHER CLARIFICATIONS

Q **Does the Authority require an automated decision on supplier eligibility?**

A No. The service may perform data validation and route reviews, but an authorized MetroLink employee must make and record the final approval decision.

Q **Does the 6-business-day onboarding goal apply when the supplier has not provided complete documentation?**

A The clock starts when the required application fields and documents are complete. Bidders must describe how the service identifies and reports incomplete applications.

Addendum 02 - Clarifications and Changes

MetroLink Regional Transit Authority I Solicitation ML-2026-041 I 24 November 2026

MIGRATION AND UNRESOLVED SERVICE LEVEL

Q **Which records need migration?**

A Only active suppliers are in scope. The Authority will provide a data dictionary and a sample extract during discovery; bidders should state migration validation and exception-handling assumptions.

Requires bidder disclosure

The RFP states a 15-minute recovery point objective (NFR-006), while its operational appendix describes nightly backups. This addendum does not resolve the conflict. Bidders must identify the discrepancy, state the recovery point their proposed service can support, and price any option needed to meet 15 minutes.

RESPONSE SCHEDULE UPDATES

- Update the migration plan and price to cover up to 10,000 active suppliers.
- Describe resumable supplier applications and the 30-day continuation period.
- Identify the maintenance allowance and explain the monthly availability calculation.
- Provide the recovery-point capability, backup frequency, and any exception to NFR-006.
- Confirm UK residency coverage for backups, operational logs, and support access.
- The revised submission deadline is 18 December 2026 at 16:00 local time.

Bidders must acknowledge receipt of this addendum in their response. Failure to identify the unresolved recovery-point conflict does not amend the underlying requirement.
